

ConwayCorpTV Quick Start Guide

Welcome to ConwayCorpTV, an innovative solution for TV viewing. This guide will walk you through the various features and functions available through your new Android TV-enabled set-top box. Let's get started!

Home Screen: Your Starting Point

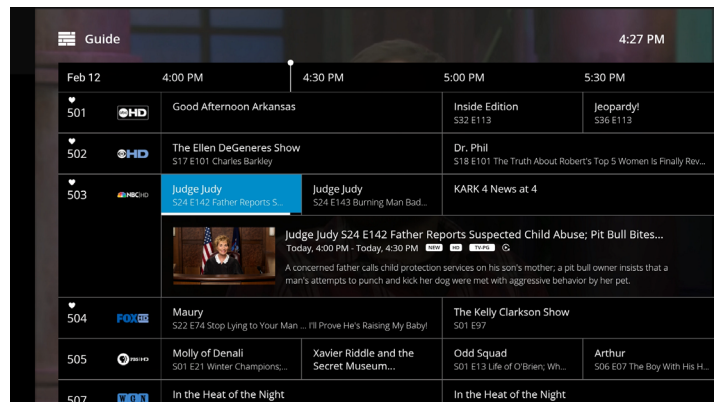

Everything you need to get started with your ConwayCorpTV experience can be found on the Home screen, including viewing options and settings to customize your experience.

You can get back to the Home screen any time by pressing the "home" or "back" button on your remote.

Guide

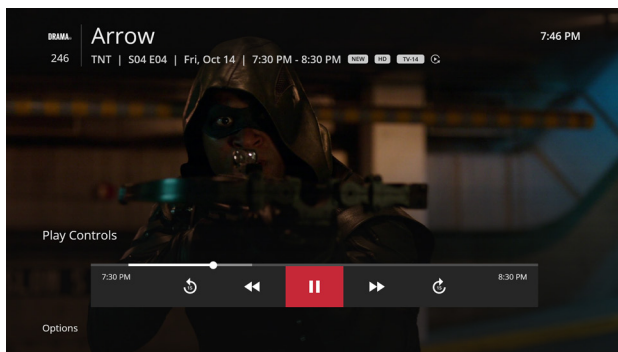

The Guide lists current and upcoming shows in channel number order. Use your remote to navigate through the Guide, and press the OK or Select button on your remote to select the show you want to watch. When selecting a show that begins at a future time, you will see the option to Record.

Watching Live TV - Start by selecting Live TV from the Home screen or select a show from the Guide.

Controls

Access Play Controls within any live show by pressing the Select button on your remote. Use the forward/backward buttons to navigate through the controls including fast forward/rewind, restart (when available) or pause.

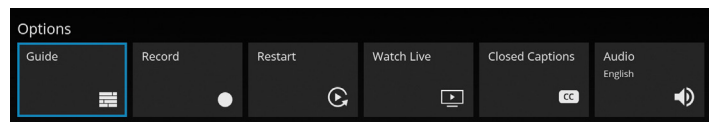

To pause the show you're watching, press the OK or Select button to display the Play Controls. Use the same button to pause your show. A paused show will automatically resume after it has been paused for 2 hours.

Options Menu

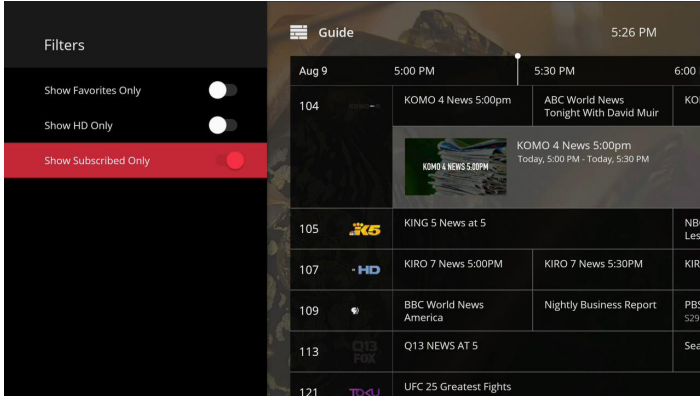

While watching any live show, press the Select or OK button on your remote, then press the down button to access more options including:

- » Guide – Takes you back to the channel listings
- » Record - Start recording the program you are currently watching (When Restart is available, the program will record from the beginning).
- » Restart - Watch the current program from the beginning (not available for every show or channel)
- » Audio Options and Closed Captioning

Filters

Customize your Guide with Filters. You may filter the Guide by Favorites, HD networks, and/or only show channels that are included in your video service subscription. To access Filters, simply use “left” button on your remote to scroll backwards through the guide until the Filters screen appears.

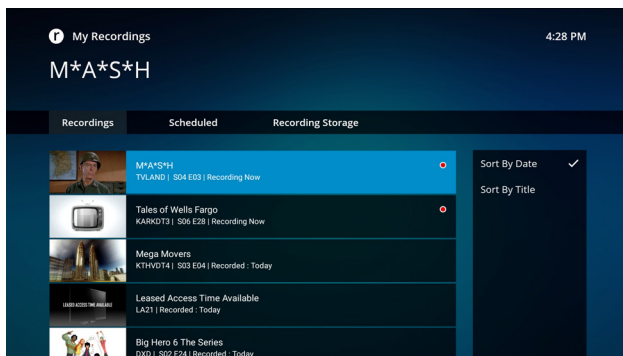

Watching Recordings

Recordings

To record a show, simply select it from the Guide and then select Record. Or, within a live show, use the Select button to show the Options menu and select Record.

Choose My Recordings from the Home screen to see all of the shows and movies you have previously recorded. Because these shows are stored on a Network DVR, or “in the cloud”, you can access them from any device from where you typically watch ConwayCorpTV. Shows with Restart enabled will automatically record from the beginning.

Apps

Select the Apps icon from the Home screen to watch content on YouTube, Netflix, Prime Video or your other favorite apps. These apps require a separate login and may also require a subscription in order to access their content.

Search

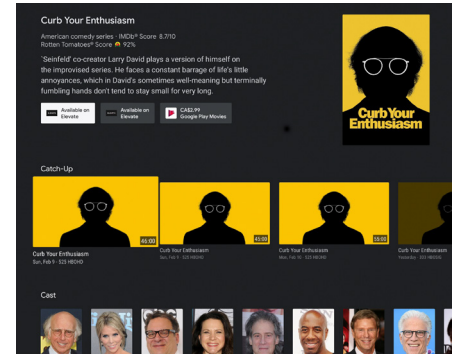

Search on-screen or using the voice-enabled remote! Select the Search icon from the Menu Bar on the Home screen, or to use voice search, simply press the microphone button on your remote to get started.

Content Search

Search for shows and movies by title, actor, topic and more. The search results will display options for Live TV, recorded programming and options to view on apps like Netflix or Prime Video.

Google Assistant

Voice search, powered by Google Assistant, takes your search to a whole new level! You can check the weather or ask about scores from last night's sports event, in addition for searching for content.
